POSEN FOUNDATION EDUCATION PROJECT

The study of Jewish culture is a springboard for asking questions about Jews and other minorities, and the roles they play in the lives of our students, schools, and society as a whole. An exploration of the rich tapestry and historical legacy of the Jewish people speaks to a variety of social and educational issues, including identity, culture, ethnicity, immigration, and diversity in the modern era. Using archival documents, literature, film, music, and art in a dynamic and interactive learning environment, teachers will gain knowledge, resources, and curricular materials and strategies for bringing the study of Jewish culture into their own classrooms.
